Passcode: 076817

Phone only: (669) 900-9128

RSVP

[RSVPs](#) are encouraged

Complete Streets is the practice of considering the mobility needs of all roadway users including people who walk, bicycle, scooter, take transit, or drive; and it is essential to all projects funded and implemented by the San Mateo County Transportation Authority (TA).

This webinar is intended to promote knowledge sharing with local elected officials, transportation advisory bodies, technical planning/engineering staff, and non-profit, business, and other organizations regarding best practices in Complete Streets policies, designs, and implementation. It will focus on three components: (1) overview of the benefits of Complete Streets for all roadway users to increase safety and comfort; (2) identify tangible ways that San Mateo County can build and prioritize better facilities; and, (3) preview ways the TA will be evaluating projects to ensure its investments provide the greatest benefits to San Mateo County residents.

Following the webinar the TA will be offering Complete Streets technical trainings for local jurisdiction engineering and planning staff. Jurisdictions that participate in the webinar and future trainings may be given additional points in future Call for Projects by demonstrating how best practices were integrated in future funding requests. The TA will be integrating information from the webinar into upcoming 2022 Call for Projects for the Pedestrian & Bicycle and Transportation Demand Management programs. This webinar was identified in the TA Strategic Plan 2020-2024 to promote the highest and best use of TA funding from the Local Streets & Road, Highway, and Pedestrian & Bicycle categories.
