

US 101/SR 92 Interchange Direct Connector Project

HILLSDALE INTERCHANGE IMPROVEMENTS FACT SHEET

Project Overview

The San Mateo County Transportation Authority (SMCTA) and the City/County Association of Governments (C/CAG) are co-sponsoring the US 101/SR 92 Direct Connector Project that proposes to create a dedicated managed lane connection between SR 92 and the US 101 Express Lanes (see Project map on the back). As part of this effort, the project team is evaluating potential improvements at the Hillsdale Boulevard interchange to address community concerns related to unsafe weaving, congestion, and neighborhood impacts.

The Hillsdale interchange improvements are being evaluated as part of the larger US 101/SR 92 Direct Connector project. The proposed changes are intended to increase safety and improve traffic operations without requiring property or land acquisition.

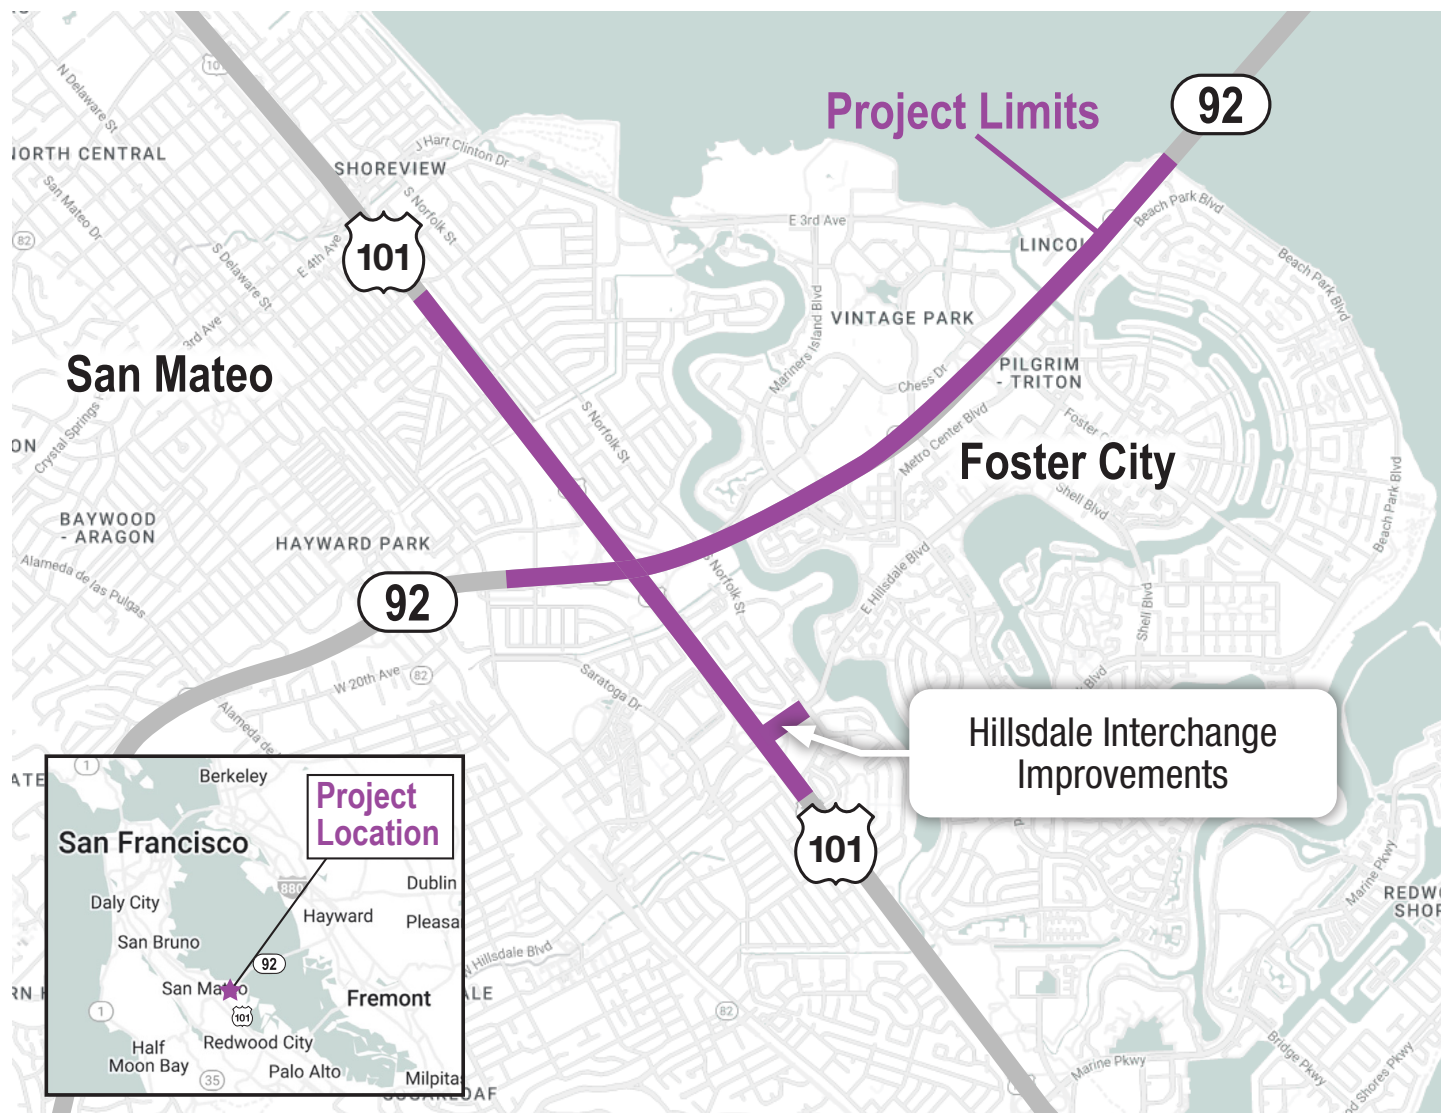

Proposed Hillsdale Interchange Improvements

- » The current northbound US 101 diagonal on-ramp would be removed and traffic would use the existing loop ramp.
- » This change would create a longer distance to allow drivers more space to safely merge onto northbound US 101 prior to the SR 92 connector.
- » Removal of the northbound diagonal on-ramp would also improve conditions for people walking and biking westbound along Hillsdale Boulevard.
- » Dedicated turn lanes would be added on Hillsdale Boulevard, including an eastbound right-turn lane and a westbound left-turn lane.

Together, the proposed improvements are expected to reduce crashes, ease congestion, and help traffic move more smoothly through this busy highway interchange. The changes are also designed to increase safety for people walking, biking, and driving by reducing conflict points, and encouraging lower vehicle speeds.

Project Timeline

Detailed traffic analysis of the modifications will be included in the Draft Environmental Document, expected to be available for public review and comment in Spring 2027.

In the Community

The project team has been meeting with neighbors through monthly virtual and/or in-person office hours at Apple Fritters. These informal sessions provide an opportunity to speak directly with project staff, ask questions, share feedback, and receive updates.
